

ALVOFF LOGISTICS

Operations made simple

Synopsis

Equipped with a strong technological backbone, Alvoff Logistics is aimed at providing businesses with an efficient and fast delivery/pickup services

Technology

Alvoff Logistics

15 Pending Deliveries

12 Pending Pickups

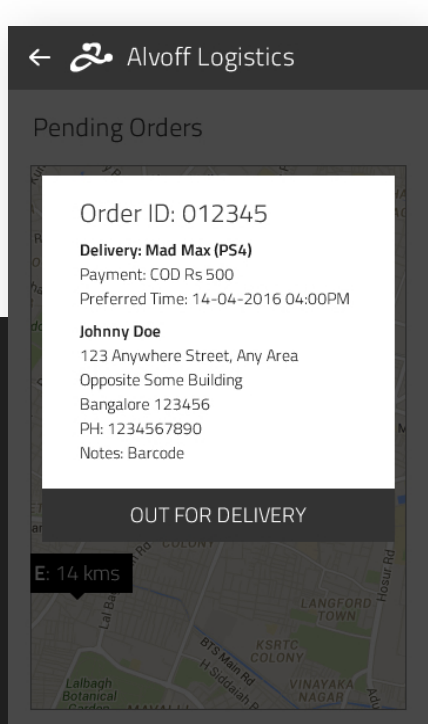

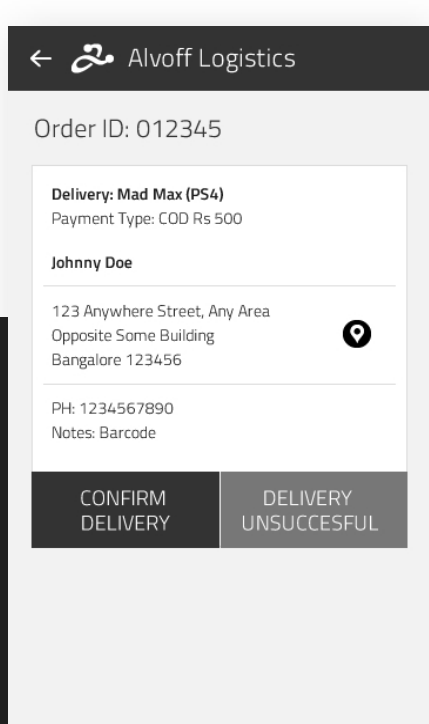

19 Pending Exchanges

The Challenge

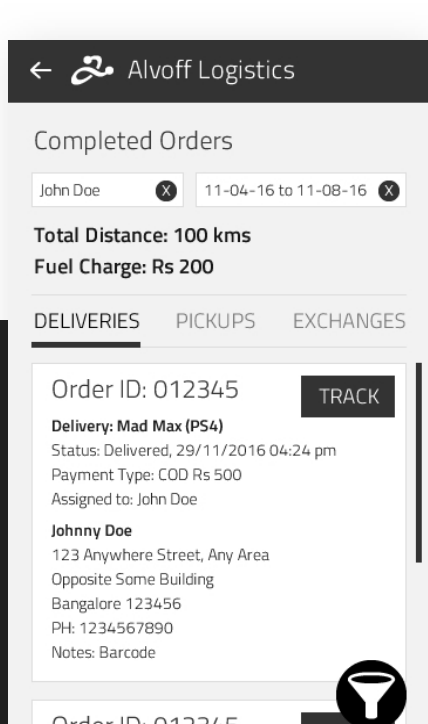

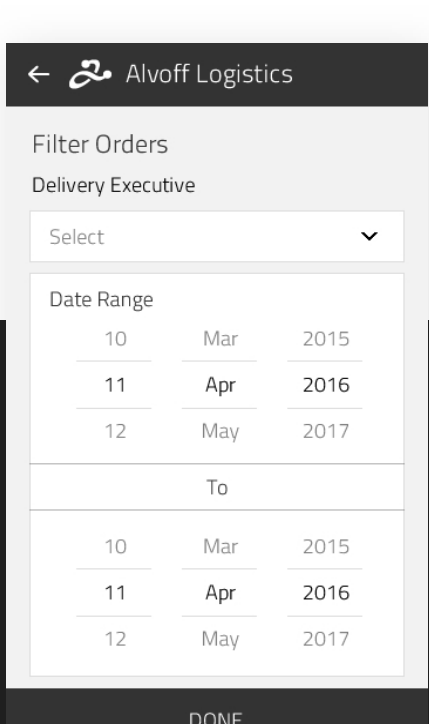

It has been observed that the Logistics companies end up spending a lot of expenditure in the costs, due to the system being not efficient enough to monitor the progress or unable to cope up with high traffic demands

Our thought process and identifications

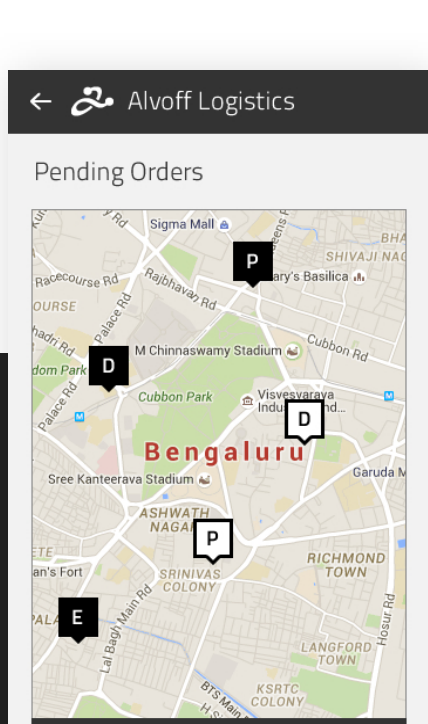

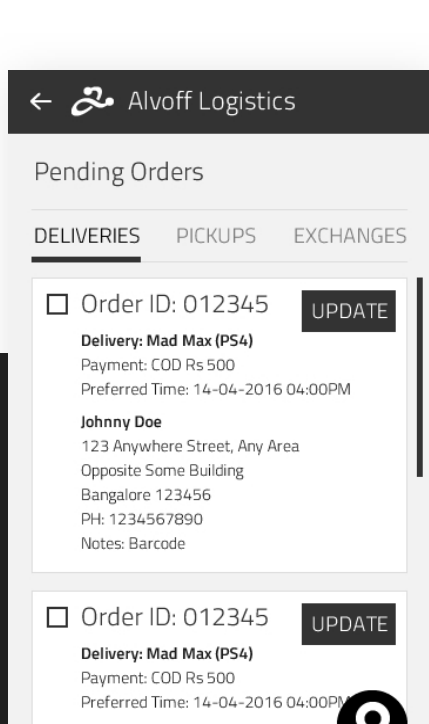

Alvoff Logistics is backed up with a strong technological backbone to provide the clients with an efficient, fast and reliable logistics service which can withstand the issues related to productivity and traffic as well as provide an easy-to-use interface between Admin, Operations, HR, Finance, Logistics and Delivery departments

Delivery Managers - "Ability to check the list of pending orders, manage Delivery Executives, assign Delivery Executive to pending order, live track an existing order and view information for the completed orders"

Delivery Executives - "Ability to navigate to the assigned task's location and to complete the task by confirming the customer by entering some details & taking his/her signature"

About the Company

Tipstat is a software development organization which was founded in the year 2012, with the aim of building smart applications to simplify processes and help clients grow businesses at a rapid pace.

Current status: Alvoff Logistics is already being used by Alvoff for its services, with the technological part being continuously modified to match with the changing needs and to make it more efficient
