

DAKOKO

Small parts, Big benefits.

Synopsis

Dakoko Software platform was created to automate price calculation used for business requirements

Technology

Web Development

The Challenge

The workflow was achieved with the use of the Pipedrive API (www.pipedrive.com). Once a product is generated in the software tool, the user is automatically forwarded price calculation section and the results of the calculation include all product details are transferred into pipedrive.

About the Client

Dakoko is a privately financed, independent, German-owned company. This way, the advantages of manufacturing in China are combined with a corporate culture that ensures both quality as well as processes and business practices of European standards. Furthermore, a strict quality management system makes sure that low costs go hand in hand with the highest possible standards.

Current status: Development completed in the time period of 2 months
